

U.S. Patent No. 5,634,706  
Applicant - James E. Barry  
Original Art Unit (Examiner) - 3406 (Quach)  
Title: ILLUMINATED GAS TANK OR SHELL

Pub.  
B'  
crit.

19. (New) The gasoline tank or hollow body shell of claim 17 wherein a portion of said body member is removed and at least a portion of said illumination member is disposed therein.

20. (New) The gasoline tank or hollow body shell of claim 17 wherein said illumination member acts as a turn signal.

21. (New) The gasoline tank or hollow body shell of claim 17 further including means for energizing said illumination member.

22. (New) A method for constructing a gasoline tank or body shell which includes an illumination member, said method comprising the steps:

(a) providing a body member in the shape of a conventional gasoline tank or body shell; and

(b) associating an illumination member with said body member.

23. (New) The method of claim 22 wherein step (b) includes associating the illumination member with a front half portion of said body member.

SP 24. (New) The method of claim 22 wherein step (b) comprises the steps of removing a portion of said body member and disposing at least a portion of said illumination member therein.

25. (New) The method of claim 22 further comprising the step of providing means for energizing said illumination member.
